

IMPORTANT

Upon receiving your blinds remove you blinds from the packaging and check for any damage that may have occurred in transport. If you find any damage do not open the blinds and contact Just Roller Blinds either by e-mail or ring on 1300 789 470 during business hours.

Fitting Instructions

1

CHECK CONTENTS

Once you unpack your blinds you will have 2 brackets, a chain winder (male) bracket (fig.1) and an idle end (female) bracket (fig.3) and 5 Screws, 4 for the brackets and 1 for the chain safe, 2 chain stops and 1 chain safe attached to the chain.

Figure 1

Figure 2

Figure 3

2

POSITION & MARK

Work out what side the operating chain was on and hold the chain winder bracket up to where you intend to fix the bracket and with a pencil mark inside the 2 outer holes in the bracket (fig.1 for inside mount and fig.2 for outside mount).

3

DRILL & SCREW

Remove the bracket and drill a small hole on each mark approx. 3mm (1/8") wide. Hold the bracket back up and with the screws supplied drill 1 into each hole.

Repeat the same with the idle end bracket.

4

ATTACH THE BLIND

Pick up the blind and insert the chain winder end in the chain winder bracket first (fig.4) insuring that the 2 lines on the top of the chain winder (fig.5) are facing upwards. Once the chain winder end is fully in place push the idle up until the spring loaded pin clicks into place (fig.6).

5

BLIND STOPS & CHAIN SAFE

The blind is now in place and ready to be operated. Pull the blind down fully and back up fully a couple of times to ensure that the blind is running smoothly. Once you are happy with the blinds operation pull the blind down fully to the bottom position where you would like the blind to stop. Once in position gently squash the chain stop on the front chain for a back rolled blind (fig.7) at the top where the chain comes out of the chain winder, or on the back chain for a front rolled blind.

Finally attach the chain safe with the screw supplied (fig.8).

Figure 7

Figure 8

Your blind may come with a small amount of masking tape inside the blind on the tube. Do Not Remove this tape.
